W6 · Who can do what

The rules behind the dashboard: who can issue logins, who sees what, and how a review decision turns into a task on the phone.

Roles and access

Each role can do everything the roles below it can, and nothing above it.

Admin — All of India → **State lead** — One state, set by the admin → **NGO** — Inside one state → **Surveyor** — Under one NGO · phone app

Who can issue logins

Issue = create the account and send the first password or OTP number.

SIGNED IN AS	STATE LEAD	NGO	SURVEYOR	WHERE
Admin	Yes	Yes	Yes	Any state (picks the state when creating a state lead)
State lead	No	Yes	Yes	Own state only
NGO	No	No	Yes	Under itself only
Surveyor	No	No	No	—

Who sees what

A farmer becomes visible on the dashboard once onboarding is finished and synced.

SIGNED IN AS	NGOS AND SURVEYORS	FARMERS	REVIEW (APPROVE, REJECT, PENDING)
Admin	Every state lead, NGO and surveyor	Every farmer in India	Yes, any farmer
State lead	NGOs and surveyors of their state	Farmers of their state	Yes, their state
NGO	Their own surveyors	Farmers onboarded by their surveyors	Yes, their surveyors' farmers
Surveyor	—	Only farmers they onboarded (phone app)	No · receives the tasks

Review rules

Reviewed separately: **Aadhaar**, **land record**, **water source photo**, **boundary KML**.
Approve needs no message. **Reject** and **Pending** cannot be saved without a message.
On save, each Reject or Pending item becomes one action item, with a red dot, on the phone of **the surveyor who onboarded that farmer**, and nobody else.
When the surveyor re-uploads, the item goes back to **New** for review. The latest decision wins; every decision stays in the history.
